ESHAN SHARMA

DevOps Lead | Multi-Cloud, Kubernetes & DevSecOps

Lucknow, India | +91 7905223208 | eshansharma.lko@gmail.com

linkedin.com/in/eshan-sharma-66a19ba1 | github.com/Eshan-06 | eshan-06.github.io

PROFESSIONAL SUMMARY

DevOps Lead with 9+ years in IT — 4+ years architecting secure, highly available, multi-cloud infrastructure (AWS and GCP in production; Azure exposure) and end-to-end CI/CD for SaaS products, preceded by 5 years of application development and support. Currently leading DevOps & DevSecOps at Estrel.ai for WiiZ, an Agentic AI SaaS Operating System, as it scales to multi-cloud enterprise deployment. Track record: 40% faster deployments, 99.9% uptime, 120+ vulnerabilities remediated, monolith to microservices migrations on Kubernetes.

TECHNICAL SKILLS

Multi-Cloud & Platforms: AWS (EC2, EKS, S3, SQS, VPC, IAM, Auto Scaling, SSM), GCP (GKE), Microsoft Azure (exposure), On-Prem Kubernetes (k3s), HA & DR, Linux, Windows Server

IaC & Automation: Terraform, Terragrunt, CloudFormation, Ansible, Helm, GitOps, Cloud Cost Optimization

CI/CD & Testing: Jenkins, GitLab CI/CD (self-hosted GitLab CE), GitHub Actions (OIDC federation), Playwright, Docker, Kubernetes (EKS/GKE/k3s), Release Engineering

DevSecOps & Compliance: SAST/DAST, VAPT, SonarQube, Snyk, Trivy, OWASP ZAP, HashiCorp Vault, Secrets Management, TLS/PKI, IAM, Zero-Trust, SOC 2, ISO 27001, GDPR readiness

SRE & Observability: Prometheus, Grafana, ELK Stack, Datadog, Custom Observability Platforms (FastAPI + MySQL, React), Allure Reporting, Incident Management & RCA, 99.9% Uptime

Languages & Data: Milvus, PostgreSQL/MySQL, MinIO, Redis, Keycloak SSO, Nginx/Caddy, Bash, Python, PowerShell, SQL/NoSQL, Agentic AI / ML Platforms

PROFESSIONAL EXPERIENCE

DevOps Lead | Estrel.ai Pvt. Ltd. **Nov 2025 – Present**

- DevOps Lead on WiiZ, Estrel AI's Agentic AI SaaS Operating System — own CI/CD pipelines, cloud infrastructure, and security controls as the platform scales toward multi-cloud enterprise deployment.
- Migrated hard-coded API keys to HashiCorp Vault secret-manager lookups; built Terragrunt IaC for GCP and on-premises k3s (IAM roles, versioned remote state, Nginx ingress).
- Own release engineering for the core AI workflow backend (580+ merged PRs): scheduled builds across dev, sandbox and prod; rollback and versioning; PR governance.
- Optimized Docker builds with multi-stage Dockerfiles and BuildKit cache mounts across ~10 backend services — ~50% faster rebuilds and leaner, more secure images.
- Built the platform observability stack (monitor.wiiz.it): FastAPI hub proxy plus standalone React dashboard for metrics, logs, executions and error summaries across environments; MySQL monitoring DB with daily partitions, 14-day retention and self-healing maintenance; token-authenticated behind SSL-terminating Nginx.
- Built the test-automation and reporting pipeline: nightly Playwright API runs via GitHub Actions; Allure reports published to private S3 and served on an EC2 host, synced via AWS SSM through GitHub OIDC and IAM roles — zero stored credentials.
- Eliminated recurring frame-upload failures across CV fleet pipelines (upload timeouts raised 30s→120s, SQL execution timeout 55s→300s); implemented the Claim-Check Pattern for AWS SQS (payloads over 250KB offloaded to S3), stopping large-document workflow failures.
- Hardened platform security: CSP headers, rate limiting, S3 IAM role fallback, SAST/DAST/VAPT in the pipeline; deployed and operated ComplyIQ, the company's regulatory-compliance product (SOC 2 / ISO 27001 governance).

DevSecOps Engineer | Prismberry Technologies **Jun 2024 – Sep 2025**

- Engineered AWS infrastructure for BizUp USA (bizupusa.com) with Terragrunt/Terraform modules: VPC, RDS, ALB, k3s Kubernetes nodes, Route53 DNS and SES email.
- Deployed and operated self-hosted platform services: GitLab CE with CI runners, Keycloak SSO, Milvus vector database, MinIO object storage, Caddy reverse proxy, and Firezone VPN.
- Architected and deployed a fully automated CI/CD pipeline using Jenkins, reducing average deployment time by 40% and enabling multiple daily production releases.
- Led monolith to microservices migration on Kubernetes; automated infrastructure provisioning with Terraform, cutting manual configuration time by 30% and eliminating configuration drift.
- Integrated SAST, DAST, and VAPT scanning into the development pipeline, identifying and remediating 120+ critical vulnerabilities before production release.

Deployment Lead | Velocis Systems Pvt. Ltd. **Sep 2022 – Jun 2024**

- Engineered and managed highly available AWS infrastructure leveraging EKS, EC2, and Auto Scaling, sustaining 99.9% uptime for mission-critical applications.
- Designed and implemented standardized CI/CD pipelines for Kubernetes applications, reducing release-related errors by 25%.
- Established Git branching and versioning conventions that improved code quality and streamlined collaboration across a 10+ person development team.

Deployment Lead | Akal Information Systems Ltd. **May 2022 – Sep 2022**

- Administered core AWS services (EC2, IAM, VPC, S3) and Kubernetes clusters; built initial CI/CD pipeline frameworks to automate build and deployment processes for enterprise applications.

Developer | SISL Infotech **Feb 2018 – Apr 2022**

- Developed and maintained Java applications (Tomcat, Nginx, JBoss) on AWS-managed Linux VMs; handled deployments, vulnerability assessments and patching — early cloud/infrastructure operations exposure.

Assistant Programmer | Eccentric Infotech **Jan 2017 – Jan 2018**

- Provided application support and troubleshooting for e-Office Sparrow and eForms portals (Ministry of Health & Family Welfare).

KEY PROJECTS

• **DevSecOps Auto-Remediation Demo (Estrel.ai):** 3-stage CI/CD pipeline (build → migrate → deploy) to AWS EC2; on failure, error context is sent to WiiZ agents for automated root-cause analysis and fixes.

• **Personal Portfolio & GitHub Pages:** Responsive portfolio site (eshan-06.github.io) — pure HTML/CSS/JS, live GitHub repo integration, deployed via GitHub Pages.

EDUCATION

Bachelor of Technology in Electronics & Communication Engineering
RD Engineering College (UPTU) — 2014
