ESHAN SHARMA

DevOps Lead | Multi-Cloud, Kubernetes & DevSecOps

Lucknow, India | +91 7905223208 | eshansharma.lko@gmail.com | linkedin.com/in/eshan-sharma-66a19ba1 | github.com/Eshan-06 | eshan-06.github.io

PROFESSIONAL SUMMARY

DevOps/DevSecOps engineer with 9+ years in IT — 4+ years architecting secure, highly available, multi-cloud infrastructure (AWS, Azure, GCP) and end-to-end CI/CD for SaaS products, preceded by 5 years of application development and support. Currently DevOps Lead on WiiZ, Estrel AI's Agentic AI SaaS Operating System — owning Terragrunt-based IaC across GCP and on-premises Kubernetes (k3s), Docker build/release pipelines, Vault-backed secrets management, and security controls as the platform scales multi-cloud, globally. Cut deployment time 40%, sustained 99.9% uptime, remediated 120+ vulnerabilities via SAST/DAST/VAPT, and led monolith-to-microservices migrations on Kubernetes.

CORE COMPETENCIES

Multi-Cloud Architecture: AWS (EC2, EKS, S3, VPC, IAM, Auto Scaling), Microsoft Azure, Google Cloud Platform (GKE), On-Prem Kubernetes (k3s), High Availability & Disaster Recovery

IaC & Automation: Terraform, Terragrunt, CloudFormation, Ansible, Helm, GitOps, Cloud-Agnostic Deployment Patterns

CI/CD & Containers: Jenkins, GitLab CI/CD (self-hosted GitLab CE), GitHub Actions, ArgoCD, Docker, Kubernetes (EKS/GKE/k3s), Release Engineering, Rollback & Versioning

DevSecOps & Security: SAST/DAST, VAPT, SonarQube, Snyk, Trivy, OWASP ZAP, HashiCorp Vault, Secrets Management, TLS/PKI, IAM Policy Design, CSP Headers, Zero-Trust

SRE & Observability: Prometheus, Grafana, ELK Stack, Datadog, Fluentd, SLAs/SLOs & Error Budgets, Incident Management & Root-Cause Analysis, 99.9% Uptime

Compliance & Cost: SOC 2, ISO 27001, GDPR Readiness, Cloud Cost Optimization, Auto-Scaling & Workload Resource Optimization

Data & Platform Services: Milvus Vector DB, PostgreSQL/MySQL, MinIO, Redis, Keycloak SSO, Nginx/Caddy, AWS SQS/S3 Event Patterns

Languages & Platforms: Bash, Python, PowerShell, SQL/NoSQL, Linux, Windows Server, Agentic AI / ML Platform Engineering

PROFESSIONAL EXPERIENCE

DevOps Lead | Estrel.ai Pvt. Ltd. — WiiZ (Agentic AI SaaS OS) **Nov 2025 – Present**

- Own DevSecOps for WiiZ, Estrel AI's Agentic AI SaaS Operating System — CI/CD pipelines, cloud infrastructure, and security controls as the platform scales toward multi-cloud enterprise deployment.
- Built Terragrunt-based IaC for GCP and on-premises Kubernetes (k3s) — service accounts/IAM roles, versioned remote state, ingress and Nginx routing; deployed HashiCorp Vault, migrating hard-coded API keys to secret-manager lookups.
- Own release engineering for the core AI workflow backend (580+ merged PRs): scheduled dev/sandbox/prod builds, rollback/versioning workflows, PR governance; optimized Docker builds (shared base image + pip cache mounts) cutting build times.
- Implemented the Claim-Check Pattern for AWS SQS (payloads >250KB offloaded to S3 with pointer messages), eliminating large-document workflow failures; built driver-manager service for ODBC/RDBMS connectivity with driver pre-warming and env-driven CORS.
- Hardened platform security: Content-Security-Policy headers, rate limiting, S3 IAM instance-role fallback, and pipeline-integrated SAST/DAST/VAPT scanning (SOC 2 / ISO 27001 readiness).
- Deployed and operated WiiZ web properties (Next.js) and CV fleet-processing pipelines across dev/test/prod environments.

DevSecOps Engineer | Prismberry Technologies **Jun 2024 – Oct 2025**

- Engineered AWS infrastructure for BizUp USA (bizupusa.com) with Terragrunt/Terraform modules: VPC, RDS, ALB, k3s Kubernetes nodes, Route53 DNS and SES email.
- Deployed and operated self-hosted platform services: GitLab CE with CI runners, Keycloak SSO, Milvus vector database, MinIO object storage, Caddy reverse proxy, and Firezone VPN.
- Architected and deployed a fully automated CI/CD pipeline using Jenkins, reducing average deployment time by 40% and enabling multiple daily production releases.
- Led monolith-to-microservices migration on Kubernetes; automated infrastructure provisioning with Terraform, cutting manual configuration time by 30% and eliminating configuration drift.
- Integrated SAST, DAST, and VAPT into the development pipeline, identifying and remediating 120+ critical vulnerabilities before production release.

Deployment Lead | Velocis Systems Pvt. Ltd. **Sep 2022 – Jun 2024**

- Engineered and managed highly available AWS infrastructure leveraging EKS, EC2, and Auto Scaling, sustaining 99.9% uptime for mission-critical applications.
- Designed and implemented standardized CI/CD pipelines for Kubernetes applications, reducing release-related errors by 25%.
- Established Git branching and versioning conventions that improved code quality and streamlined collaboration across a 10+ person development team.

Deployment Lead | Akal Information Systems Ltd. **May 2022 – Sep 2022**

- Administered core AWS services (EC2, IAM, VPC, S3) and Kubernetes clusters; built initial CI/CD pipeline frameworks to automate build and deployment processes for enterprise applications.

Developer | SISL Infotech **Mar 2018 – Apr 2022**

- Developed and maintained Java applications (Tomcat, Nginx, JBoss) on AWS-managed Linux VMs; handled deployments, vulnerability assessments and patching — early cloud/infrastructure operations exposure.

Assistant Programmer | Eccentric Infotech **Jan 2017 – Jan 2018**

- Provided application support and troubleshooting for e-Office Sparrow and eForms portals (Ministry of Health & Family Welfare).

KEY PROJECTS

- **WiiZ Platform DevSecOps (Estrel.ai):** Terragrunt IaC (GCP + on-prem k3s), Vault secrets, Docker build optimization, SQS/S3 claim-check pattern, CSP hardening, multi-environment release automation.
- **BizUp USA Cloud Infrastructure (Prismberry):** Production AWS platform — Terragrunt-managed VPC/RDS/ALB/k3s, self-hosted GitLab CE + CI runners, Keycloak SSO, Milvus, MinIO, Caddy, Firezone VPN.
- **DevSecOps Auto-Remediation Demo (Estrel.ai):** 3-stage CI/CD pipeline (build → migrate → deploy) to AWS EC2; on failure, error context is sent to WiiZ agents for automated root-cause analysis and fixes.
- **Personal Portfolio & GitHub Pages:** Responsive portfolio (eshan-06.github.io) — pure HTML/CSS/JS, live GitHub repo integration.

EDUCATION

Bachelor of Technology in Electronics & Communication Engineering
RD Engineering College (UPTU) — 2014
